Technical data sheet

Aquawood Finapro 60

5176

Water-based, **glossy thick-coat glaze** for **wooden windows and exterior doors**, for use in industry and trade

Optimised for a 3-layer coating system

PRODUCT DESCRIPTION

General

Glossy, water-based, breathable thick-coat glaze with very good weathering resistance and a high degree of transparency. Stand-out features of this product include very good block resistance, very good impact strength, rapid establishment of water resistance, short drying times, improved resistance to mechanical damage, a natural look and a pleasant feel.

Special properties and standards

ÖNORM EN 71-3

DIN 53160-1 and DIN 53160-2 Perspiration and saliva-proof properties

French ordinance DEVL1104875A
 Marking of construction coating products for their emission of volatile pollutants: A+

Application area

For dimensionally stable timber components for exterior and interior use, such as e.g. wooden windows and front doors.

For humid areas (e.g. indoor pools) only with a special coating system.

For non-dimensionally stable timber components we recommend thin-film systems such as Lignovit Lasur (5315) or Pullex Plus-Lasur (4415).

PROCESSING

Processing instructions

- Please stir the product before use. However, prevent entry of air while stirring.
- The temperature of the product and object, and the room temperature must be at least + 15 °C.
- The optimal conditions for use are between 15 25 °C with a relative atmospheric humidity between 40 - 80 %.

1-0 IMC 5176 | 05/25

- Too high dry film thicknesses from approx. 120 µm reduce the diffusion capacity and should thus be avoided.
- Sealants must be compatible with the coat and may only be applied once
 the paint has dried through. Sealing profiles with plasticizers tend to
 stick together in combination with paints. Please only use those types
 that have been tested.
- An intermediate coating with Aquawood Intermedio ISO (5705) is recommended to prevent air inclusions in deep-pored hardwood species and to avoid film interference on larch.
- When changing from Aquawood Finapro 60 (5176) to other water-based paint systems, care must be taken to adequately clean the pipes and spray equipment, preferably with warm water.
- Any change in the processing sequence, environmental conditions, nonobservance of instructions or the use of products not listed may have an unfavourable effect on the result. Deviations lead to film and adhesion problems as well as to impairments with regard to weathering and color stability.
- Please follow our ARL 300 Working guideline for coating dimensionally stable and limited dimensionally stable construction elements - General part along with all standards and guidelines for window construction.

Application technique

| | Airless | Airless air-supported (Airmix®, Aircoat, etc.) |
|--|---------|--|
| Spraying nozzle Ø (mm) | | 0,28 - 0,33 |
| Spray nozzle (Ø inch) | | 0,011 – 0,013 |
| Nozzle angle (°) | | 20 – 40 |
| Spraying pressure (bar) | | 80 – 100 |
| Vaporizer Air (bar) | - | 0,5 – 1,5 |
| Spraying distance (cm) | | 25 |
| Diluent | | Water |
| Diluent amount added (%) | | 0 – 5 |
| Applied quantity per application (g/m²) | | 225 – 300 |
| Wet film (μm) | | 225 – 300 |
| Dry film complete coating system (µm) | | 80 – 120 |

The shape and surface condition of the workpiece as well as the type of application influence the actual consumption. Accurate values for consumption must be obtained by applying trial coats in advance.

Drying times

(at 23 °C and 50 % rel. humidity)

| Dust-dry (ISO 1517) | ca. 1 h |
|--|-----------------|
| Tack-free | ca. 2 hour(s) |
| Stackable with PE fine foam spacers at room temperature | ca. 5 hour(s) |
| Stackable with PE fine foam spacers after forced drying 20 minutes evaporation zone / dripping zone 90 minutes drying stage (35 – 40 °C) 20 minutes cooling stage | ca. 130 minutes |
| Recoatable | ca. 12 h |

The figures given above are reference values. The drying time depends on the type of substrate, coat thickness, temperature, air exchange and relative atmospheric humidity.

Lower temperatures and/or high level of atmospheric humidity can increase the drying time.

Avoid direct sunlight!

Cleaning the working equipment

With water immediately after use.

To remove dried paint residues we recommend using Aqua-Cleaner (8029) (diluted 1:1 with water).

| | SUBSTRATE |
|--------------------|---|
| Type of substrate | Wood in accordance with the guidelines for window construction. |
| Substrate property | The substrate must be dry, clean, capable of holding the paint, free from separating substances such as grease, wax, silicone, resin etc. and free from wood dust, as well as tested for suitability for coating. |
| Wood moisture | 13 % ± 2 % |
| | COATING SYSTEM |
| General | The following coating systems are exemplary. |
| Impregnation | 1 x Aquawood Primo (5453) |
| . 5 | Intermediate drying: approx. 4 hour(s) |
| | Use wood preservatives safely. Always read the label and observe the respective technical data sheets of the products before use. |
| | Please follow our ARL 056 - Working guideline for the use of wood preservatives. |
| Intermediate coat | Softwoods: |
| | 1 x Aquawood Intermedio DQ (5706) |
| | Hardwoods and Larch: |
| | 1 x Aquawood Intermedio ISO (5705) |
| | Intermediate drying: approx. 2 hour(s) |
| | Please refer to the corresponding technical data sheets of the products. |
| | . 3 |

| Intermediate sanding | Grit size 220 – 280 Remove sanding dust. |
|---|---|
| Finishing coat | 1 x Aquawood Finapro 60 (5176) |
| For front doors | An additional application of Aquawood Protect (5128) (colourless two-component varnish) is necessary. |
| | MAINTENANCE |
| Сате | The durability depends on several factors: these include particularly the type of weathering, constructive protection, mechanical stress and the choice of colour applied. To obtain long durability, regular inspection, maintenance and, if necessary, repair measures are necessary. |
| | Annual cleaning with Top-Cleaner (7208) and maintenance with Top-Care (7227) in the package with Windoor Care-Set (7229). |
| | Please follow our ARL 304 - Working guideline for coating dimensionally stable and limited dimensionally stable construction elements - Maintenance and repair. |
| | |

Aquawood Intermedio ISO (5705) Aquawood Protect (5128)

Aquawood Protect (5128) Aqua-Cleaner 8029 (8029)

Top-Cleaner (7208) Top-Care (7227)

Windoor Care-Set (7229) Pullex Plus-Lasur (4415) Lignovit Lasur (5315)

Please refer to the corresponding technical data sheets of the products.

FURTHER DETAILS

Durability / storage

Min. 1 year(s) in the original sealed containers.

Make sure the product is protected against moisture, direct sunlight, frost and high temperatures (above 30 °C).

Close opened containers well and use up the content as soon as possible.

Technical specifications

VOC content of the ready-to-use mixture: Limit value according to Directive 2004/42/EC for Aquawood Finapro 60 (Cat A/e): 130 g/l. Aquawood Finapro 60 contains a maximum of 20 g/l VOC.

Giscode

BSW20

DGNB (German Sustainable Building Council)

Quality level 4 (with factory coating)

Safety information

The product is only suitable for the industrial and professional use.

When sanding, use at least a P2 dust filter as personal safety equipment to protect against abrasive and wood dust. In case of hardwood (especially for Beech, Oak) a dust filter P3 is recommended.

The inhalation of paint aerosols during spray application must generally be avoided. This is ensured by the proper use of a respirator (combination filter A2/P2).

Further information on the subject of safety during transport, storage and handling as well as disposal can be found in the relevant safety data sheet. The current version can be accessed on the Internet at **www.adler-lacke.com**.
