

Bluefin Pigmocryl NG G50

3205

Water-based pigment topcoat for furniture and interior finishing for industrial and professional use

	PRODUCT DESCRIPTION
General	Water-based, pigmented one-component furniture coating with fast drying and good mechanical and chemical resistance. The cream and grease resistant (CFB) product is characterised by high resistance to the effects of light, good filling power and very good stability on vertical surfaces.
Special properties and standards	ADLER green label product - tested according to 3 categories: Environment, Health & Safety and Durability. Please also observe the sustainability data sheet.
	• ÖNORM A 1605-12 (furniture surfaces) Resistance to chemical reactions: 1-C Response to abrasion: 2-D (≥ 50 U) Response to scratches: 4-E (≥ 0.5 N) Flame treatment: 5-B (hardly inflammable furniture surface)
	• DIN 68861 (furniture surfaces) Part 1: Response to chemical stress: 1 C Part 2: Response to abrasion: 2 D (over 50 up to 150 U) Part 4: Response to scratches: 4 E (> 0.5 until ≤ 1.0 N)
	 ÖNORM A 3800-1 (fire behaviour) in conjunction with a flame- retardant substrate: flame-retardant, Q1, Tr 1
Produkt ist deklariert und validiert EMISSIONS DANS L'AIR INTÉRIEUR-	 ÖNORM EN 71-3 Safety of toys; migration of certain elements (free of heavy metals)
	 DIN 53160-1 and DIN 53160-2 perspiration and saliva-proof properties
	Registered in baubook
	 French ordinance DEVL1104875A regarding the marking of construction coating products for their emission of volatile pollutants: A+
Application areas	Open and closed-pore varnished pigmented coating surfaces.

12-22 (supersedes 06-21) ZKL 3205

ADLER-Werk Lackfabrik, A-6130 Schwaz

For furniture, interior finishing, wood panelling and wooden ceilings

For hardly inflammable or flame-retardant coating systems

PROCESSING

Instructions for use

- Please stir the product before use.
- The temperature of the product and object, and the room temperature must be at least +15 °C.
- Considerably increased temperature and/or low atmospheric humidity will accelerate the drying, whereby flow and degasification can be negatively influenced. In these cases we recommend the addition of 5 % Agua-Fluid V 8052.
- For highly stressed surfaces (tables, chairs, doors, etc.), we basically recommend the application of Bluefin Top-Antiscratch 2960 (chemical resistance 1-B1 according to ÖNORM A 1605-12 Prüfung 1 also in the colour shade RAL 9010 "pure white") or Bluefin Resist 2963. Thereby you can achieve surfaces, which are resistant to ring indentation and highly resistant to mechanical stress. Intermediate drying time: at least 12 hours, max. 3 days.
- When coating interior doors, it must be ensured that only sealing profiles compatible with acrylic paints are used.
- If plastic edges are used, an adhesion test must always be carried out with the planned coating system. When using ABS-Kantenaktivator 8315 an adhesion improvement can be achieved on ABS edges.
- Please refer to the corresponding technical data sheets of the products.
- Please follow our ARL 150 Working guidelines for waterbased furniture coatings.

Application technique

0-5% H₂O

Application method	Airless	Airless air- supported (Airmix, Aircoat, etc.)	Cup gun	
Spray nozzle (ø mm)	0.23 - 0.33	0.23 - 0.33	2.0	
Spraying pressure (bar)	100 - 120	80 - 100	2 - 3	
Atomized air (bar)	-	1 - 2	-	
Dilution (thinning)	water			
Thinner- added in %	-	-	0 - 5	
Application quantity per	approx. 120 – 200 total application amount max 450			
application (g/m²)	 closed pore surfaces: approx. 130 open pore coating system in pastel shades and RAL 9010: approx. 150-200 open pore structures in full shades: approx. 120-150 			

The shape and properties of the substrate affect the consumption/yield. Accurate values for consumption must be obtained by applying trial coats in advance.

Drying times

(at 23 °C and 50 % rel. humidity)

the

Sandable and recoatable with Pigmocryl NG in	after approx.
various qualities	2 hours
Recoatable with e.g. Bluefin Top-Antiscratch 2960	approx. 12
or Bluefin Resist 2963	hours,
	max. 3 days

The figures given above are reference values. The drying time depends on the type of substrate, coat thickness, temperature, air exchange and relative atmospheric humidity.

Cleaning equipment

working

Immediately after use with water or Aqua-Cleaner 80080 (diluted 1:1 with water).

	SUBSTRATE	
Type of substrate	Solid wood, chipboard or wood fibre materials suitable for opaquivarnishing, veneered or coated with priming film.	
Substrate property	The substrate must be dry, clean, capable of holding the paint, from separating substances such as grease, wax, silicone, resin and free from wood dust, as well as tested for suitability for coating	
Preparation of the substrate	Wood sanding: grit size 150 - 180	
	Film-coated chip boards: Sanding with grit size 180 – 220	

COATING SYSTEM

Primer

For closed-pore surfaces

- a) Chipboard or MDF boards with foil depending on quality requirements (fullness, uniformity of surface) without primer or 1 x with Bluefin Isospeed 3134
- Solid wood or particle boards veneered using blind veneer (e.g beech), 2x with Bluefin Isospeed Weiß 3134000010 or Aqua-Isospeed Thix Weiß 31017
- c) MDF boards, with 2 to 3 primer coats using Bluefin Isospeed 3134 + 5 % Aqua-Hardener 8450000210 oder Aqua-Isospeed Thix Weiß 31017 + 5 % Aqua-Hardener 8450000210; or 1 preinsulation with Bluefin Unistar 2965 and 2 primer coats using Bluefin Isospeed 3134

For open-pore surfaces

Pre-insulation with 150 - 200 g/m 2 Bluefin Isospeed 3134 + 5 % Aqua-Hardener 8450000210 for

- wood species with a tendency to resin flow (e. g. pine)
- wood species with water-soluble colouring wood components (e. g. ash)
- coating systems in RAL 9010 "Reinweiß" (pure white) and in pastel shades

Regarding coating systems for full-tone-colours it is sufficient to apply one primer coat using 150 - 200 g/m² Bluefin Pigmocryl NG 3205.

Drying overnight at room temp	erature.
-------------------------------	----------

Please refer to the corresponding technical data sheets of the products.

Intermediate sanding

Grit size 280 - 360

Avoid sanding straight through!

Topcoat Bluefin Pigmocryl NG 3205

CLEANING AND MAINTENANCE

Cleaning and maintenance

Cleaning with Clean Möbelreiniger 96490 and maintance with Clean-Möbelpflege Plus 7222000210.

Please refer to the corresponding technical data sheets of the products.

ORDERING INFORMATION

Size of trading unit 1 kg, 4 kg, 22 kg

Colour shades / degrees of Standard colours:

gloss
