

Set it and forget it.

THE MAINTENANCE-FREE SURFACE FOR WOODEN FACADES.

Thanks to our many years of experience in timber construction, we are certain that a smooth, consistently flawless wood surface is possible. A maintenance-free wooden surface that could not be more natural. Breathable, ecological and perfectly protected from wind and weather.

Achieve the modern patina effect from the very first application – while perfectly protecting your precious wood – with the ADLER Platinum system.

H8 BAD AIBLING

Decades of experience confirm we're right!

90 years ago, Johann Berghofer laid the foundation stone for ADLER and work was started to develop its own paints.

Much has changed since that time, but one thing has stayed the same: our passion for colour, which drives us day after day to work on the perfect surface coating.

Paint runs through our veins.

Color images with the Lignovit/ignovit Platinum coating system, offering a slight metallic look.

ADLER Platinum PRE-GREYING FOR ETERNITY.

- natural, breathable wood finish
- maintenance-free
- uniform patina
- lively and permanently beautiful

This system guarantees maintenance-free, long-term protection and elegant beauty, without compromising the vitality of wood as a natural building material. The surface of the patinated façade weathers naturally over time. Over time, the coated patina evolves into a natural patina.

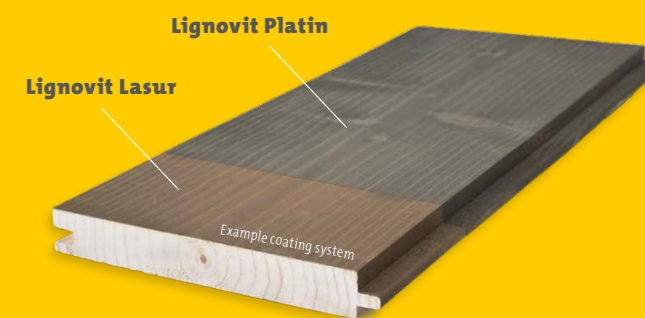

Protected areas, such as eaves or window junctions, remain free of unintended color variations, giving the façade a consistently harmonious appearance.

Not like this:
Untreated wood
façades develop
uneven and unpre-
dictable greying.

Standard coating system

20 YEARS OF EXPERIENCE

With our long-proven system build-up of Lignovit Lasur & Lignovit Platin, you achieve perfect results. It strengthens the wood fibers, compensates for unevenly absorbing substrates, and, with its reflective metallic pigments, delivers extra UV protection, a radiant sheen, and a durable, even patina.

According to EN 13501-1 fire performance classification, the standard system achieves D-S1, D0!

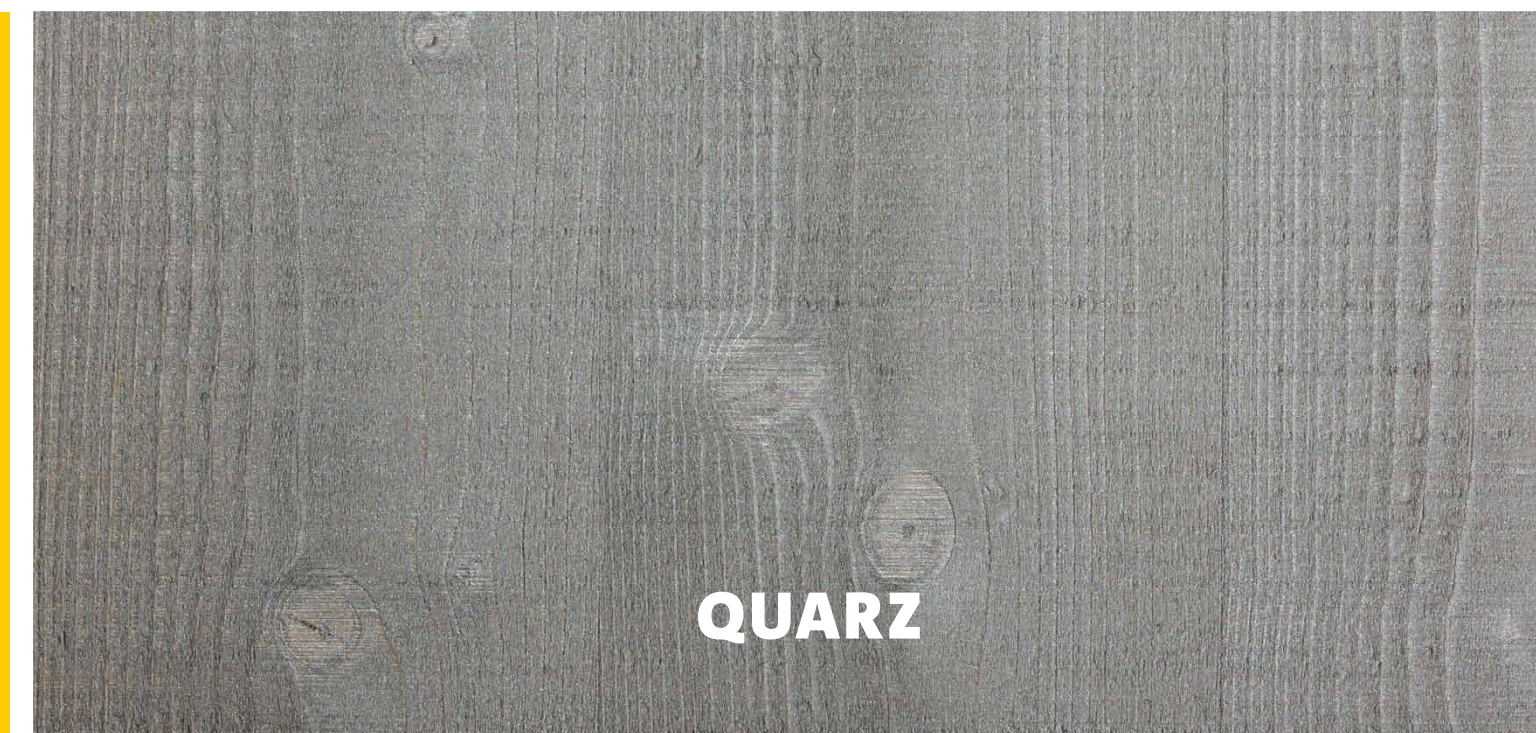

Pre-greying system options*

	Coating	ZKL	Active ingredients	Quality level according to ^{DGNB**} ENV 1.2			Class of reclaimed timber	Appearance	Focus
				Line	Coating	on site/factory			
Var. 1	Lignovit Lasur	5315	Film protection	1	QS3	QS3/QS4	A II	Design, slightly metallic	Perfect weather protection
	Lignovit Platin	5318			QS3				
Var. 2	Lignovit 3in1-Lasur	5327	Wood protection	30b	QS3	QS3/QS3	A IV	Dull matt, natural	Outstanding weather protection
	Lignovit 3in1-Lasur	5327			QS3				
Var. 3	Lignovit Terra	5341	none	1	QS4	QS3/QS4	A II	Design, slightly metallic	Green Building***
	Lignovit Platin WF	5362			QS3				
Var. 4	Lignovit Terra	5341	none	1	QS4	QS4/QS4	A II	Dull matt Natural	Green Building***
	Lignovit Terra	5341			QS4				

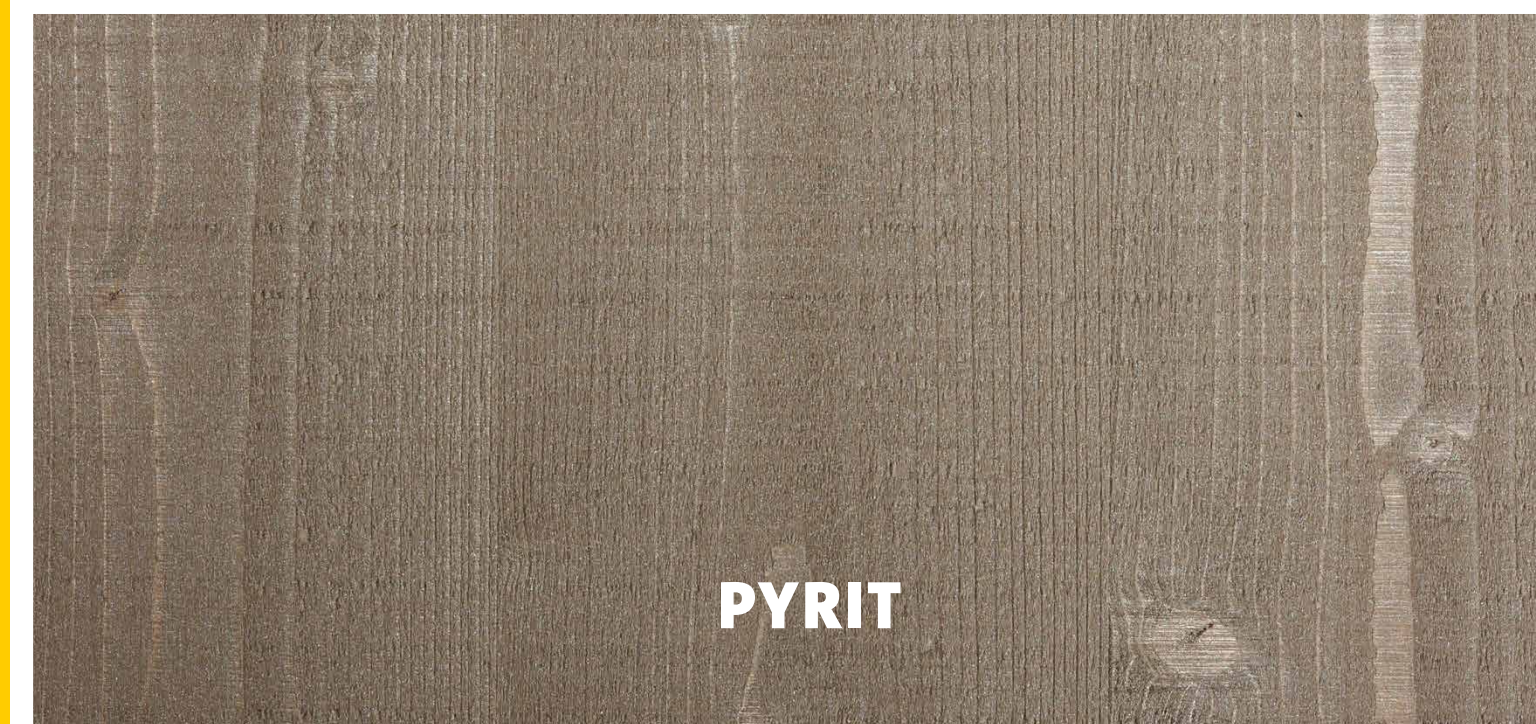

* All detailed information relating to types of wood, coating system or workpiece can be found in the working guideline ARL 306 - ADLER Platinum, The maintenance-free surface for wooden façades. Colour deviations from the original shade are due to the printing process. To assess the final colour shade, we recommend preparing a colour sample of the selected coating system on the original substrate. Use wood preservatives safely. Always read the label and observe the relative technical data sheets of the products before use.

** German Sustainable Building Council - DGNB e. V.

*** As these products/systems contain neither wood preservatives nor film preservatives, biological infestation of the wooden façade cannot be ruled out.
