BLUEFIN PIGMOSOFT

THE VELVETY SELF-HEALER

Paint runs through our veins.

BLUEFIN PIGMOFOFT

BRILLANT. SOFT. VELVETY.

Matt, opaque surfaces are currently popular on the market. With their modern appearance and velvety feel, they create a pleasant ambient atmosphere. Unfortunately, it is precisely these surfaces that are vulnerable to scratches and daily signs of wear.

FOCUS ON THE FUTURE

As innovation driver, ADLER is always one step ahead and offers with Bluefin Pigmosoft the solution for unpleasant sheen, scratches, or similar strains of the surface.

Despite a dull matt and velvety surface, Bluefin Pigmosoft gains points with exceptional scratch and ring indentation resistance. As compared to other matt paints, Bluefin Pigmosoft is characterised by innovative self-regeneration that protects the surface from developing a sheen and regenerates independently in the case of scratches. This ground-breaking product means you can say farewell to signs of wear. Moreover, unpleasant fingerprints can be avoided thanks to a special anti-fingerprint protection. Bluefin Pigmosoft is exceptionally efficient in use after only one coat, and thus saves not only resources but also costs.

SPECIAL PROPERTIES

DULL MATT SURFACE
reduced polish up

ANTI-FINGERPRINT
no visible fingerprints

INNOVATIVE SELF-REGENERATION
thanks to an innovative raw material technology

SOFTTOUCH SURFACE
velvety feel

CLEANING AND REGENERATION
with ADLER Clean-Möbelreiniger

PERFECT LIGHT RESISTANCE
and colour brilliance

TOP EFFICIENCY
one coat of paint is enough

**HIGH WATER
AND OIL RESISTANCE**

EXCEPTIONAL SCRATCH RESISTANCE
and resistance to sheen formation

PERFECT COVER OF EDGING
Invisible joint

Pigment paint 1K **Bluefin Pigmosoft** **Pigment paint 2K**

overnight

INNOVATIVE SELF-REGENERATION

The velvety self-healer gains points thanks to low sheen formation, but also particularly thanks to its unique self-regeneration. The use of special raw materials creates a surface that always returns to the initial state, even after higher exposure to stress. The result speaks for itself – after only a few hours, the signs of wear are barely recognisable. The surface is fully regenerated overnight. The regeneration time can be shortened with the help of ADLER Clean-Möbelreiniger 96490

ADLER

Paint runs through our veins.

BLUEFIN PIGMOSOFT

The velvety self-healer

Self-regenerating 2C pigment paint with velvety feel and dull matt appearance.

✓ **Exceptional chemical resistance**

1-B1 according to ÖNORM A 1605-12.1 and 1 B according to DIN 68861-1, with the exception of pure white and pastel shades.
