OUR VEINS.**

ADLER | industry

**ADLER**  
Paint runs through our veins.

## ADLER at a glance

-  founded in 1934, family-owned company ever since
-  Austria's leading manufacturer of varnishes, paints and wood preservatives with a market share of over 70 %
-  production facilities exclusively in Schwaz, Austria
-  operating globally in 25 countries (subsidiaries in Germany, Italy, Czech Republic, Poland, Switzerland and Slovakia)
-  comprehensive product portfolio: wood preservatives, furniture coatings and stains, window and door coating systems
-  600 employees, of which 110 in R & D, 10 % of total sales are annually reinvested in R & D
-  tailor-made coating solutions specifically customised for your production process
-  personal and individual consultation
-  well-founded product, technical and machinery expertise
-  our in-house application technology guarantees you convenient, trouble-free production
-  plant optimisation and colour harmonisation between different suppliers and production sites
-  closely connected within the industry and architecture sector

## We produce coatings for...

- |                   |                              |
|-------------------|------------------------------|
| furniture         | front doors                  |
| kitchens          | wooden buildings             |
| interior fittings | prefabricated building parts |
| internal doors    | wooden products              |
| parquet floors    | ship interior fittings       |
| stairs            | impregnating plants          |
| mouldings         | coffins                      |
| windows           |                              |

## Our systems & technologies ...

- |                       |                                       |
|-----------------------|---------------------------------------|
| wood protection       | fire protection coatings              |
| stains                | vacuum, curtain and dip coatings      |
| PUR paints            | Inert technology                      |
| water-based paints    | Excimer technology                    |
| UV water-based paints | self-healing paint systems            |
| full UV systems       | glasses coatings                      |
| oils & waxes          | primer & topcoat for digital printing |
| glass painting        | cleaning & maintenance                |
| effect paints         |                                       |

## CHALLENGE US:

**We develop the best coating solution for you.**  
**COMPETENT. INNOVATIVE. EFFICIENT.**

In an era of intense competition, we are happy to work with clients to constantly push the limits of coating solutions and drive real business success.
