

Preserving and cleaning oiled and waxed surfaces

Waxed and oiled surfaces require regular preservation so that they may maintain their beauty for a long time.

Oiled and waxed pieces of furniture are beautiful and natural – above all, when you preserve and retouch them regularly. ADLER recommends treating them once a year with ADLER Legno-Pflegeöl (Preservative oil) for this purpose.

CLEANING:

Cleaning with water:

Slightly soiled spots (e.g. fingerprints) can be cleaned with warm water or a wood soap (curd soap). Make sure to wipe the surface dry thereafter!

Cleaning with Legno Reiniger (Cleaner):

For greasy or severely soiled surfaces (e.g. legs of tables and chairs), use **Legno-Reiniger**.

PRESERVATION AND TOUCHING UP

Apply a thin layer of **Legno-Pflegeöl** (Preservative oil) or **Legno-Hartwachsöl** (Hard wax oil) using the ADLER preservative cloth. You may polish the surface with a woollen cloth after allowing it to dry for about 5 minutes.

Attention: Do not use any micro-fibre cloths, grease-removing household cleaning agents or steam cleaners!

Other Tips and Tricks:

- **Oiling parquet or wooden flooring**
